# THE REALITY?

# PROBLEM STATEMENT

Philippine flood control infrastructure is failing **not because** of insufficient funding, but because of **a lack of reinforced systemic accountability**.

Government processes exist, contractors undergo bidding and procurement process, projects are implemented. But at every stage, the system lacks **visibility, call-out mechanisms, and consequences for perpetrators**.

3

## OPACITY IN PROCUREMENT

contractors bid behind closed doors with no real-time transparency about pricing anomalies, leaving **collusion undetected** and **costs inflated**

## SILENCE FROM STAKEHOLDERS

affected individuals/families are disengaged/lack accessible mechanisms to monitor and demand action on stalled projects, **creating 0 pressure for timely delivery**

## OVER-DELAYED ACCOUNTABILITY

oversight mechanisms (audits, inspections, contract enforcement) are so paralyzed that **detection of delays or ghost projects happens months or years after damage is done**
